### FSK225-A-SL

The FSK225-A-SL is a 2.25 liter system that provides competitors with the highest levels of protection. Its slim line design and lightweight aluminum bottle make this system ideal for single seat racecars, drag racers, saloon and rally vehicles. The system splits the charge evenly between the cockpit and the engine compartment.

- 2.25 liter aluminum bottle
- Complete installation and mounting hardware
- 2 nozzle
- Charged to 7 Bar (100 PSI)
- Length 14"
- Diameter 5"
- System weight: 11 lbs.

### FSK400

The FSK400 is a 4 liter, FIA homologated system designed specifically for closed cockpit vehicles such as rally, saloon and sports cars. The FSK 400 system features an economical steel bottle that reduces cost while still providing high levels of protection. The system splits the charge evenly between the cockpit and the engine compartment.

- 4 liter steel bottle
- Complete installation and mounting hardware
- 6 nozzle
- Charged to 8 Bar (116 PSI)
- Length 17"
- Diameter 6"
- System weight: 18 lbs.

Fuel Safe Racing Cells®, a name synonymous with performance and safety, now offers Fire Safe™ fire suppression systems for all types of race vehicles. Fire Safe™ systems are specifically designed for use in competition vehicles and offer the latest in on-board fire suppression technology. Utilizing AFFF (Aqueous Film Forming Foam) these non-toxic ozone friendly suppression systems give competitors the same level of protection whether driving Formula 1, WRC or SCCA club racing.
