

## **Security Policy**

The security of your information is very important to us. To protect that information, we maintain reasonable physical, procedural and technical measures to limit access to authorized individuals.

We utilize a certified shopping cart on our website, which sends transactions to the payment gateway using an end-to-end Secure Sockets Layer (SSL) connection to encrypt and transmit your credit card information. SSL is one of the highest levels of transaction security protocols available. This payment process connects through Authorize.Net® which adds another layer of fraud detection tools to protect against misuse of credit cards.

Even though we take these measures to protect and secure your personal data, we cannot guarantee that all electronic commerce is completely secure.

If you believe that someone has improperly used personally identifiable information about you or has made purchases that you did not authorize, please contact us or your credit card company immediately.
