

# EARLY MODEL MUSTANG CELLS

## Early Model Mustang Racing Fuel Cells

Fuel Safe's early model Mustang cells (1964½ - 1970) can turn your classic Mustang into a modern race car. They are available in 16 and 22 gallon sizes with either a Pro Cell® or Sportsman® bladder. The Pro Cell® bladder is extremely durable and is the best bladder for E-85 while the Sportsman® is the lightest weight. Both bladders are for use with all hydrocarbon fuels. All cells feature high quality aluminum container and the same aircraft grade hardware that comes standard on all of our racing cells.

All Mustang cells come with the following hardware:

- TIG welded aluminum container
- SF6X10A fill plate with -8 vent and provision for -8 return
- -8 pickup (in factory location). Remote fill options are available.
- Full safety foam baffling, minimizes fuel slosh and potential for explosion
- 2 year manufacturer warranty

# LATE MODEL MUSTANG

LATE MODEL MUSTANG RACING CELLS

## Late Model Mustang Racing Fuel Cells

Fuel Safe's late model racing cells are available for the model years 1980 through 2004. Designed in conjunction with Ford, our fuel cells will accommodate both solid axle and IRS rear end setups. Both cells are built with Pro Cell® bladders. All cells feature a high quality aluminum container and the same aircraft grade hardware that comes standard on all of our race cells. All cells come with mounting straps specific to the vehicle model year so be sure to specify year of car. All Mustang cells come with the following hardware:

- TIG welded aluminum container
- FIA-FT3 approved Pro Cell®
- Comes with custom plates designed to accommodate factory hookups; utilizes customer's stock components; e.g., sending unit, vent, pump.
- Full safety foam baffling, minimizes fuel slosh and the potential for an explosion
- 2 year manufacturer warranty
